

## Award winning clinical care solution offers even more

AutumnCare will soon launch version 4.1 of their award winning clinical care solution.

Building upon the already highly popular AutumnCare Connect product, this version offers new functions and for the first time offers both a complete residential and community care solution.

In addition to their new community care product, version 4.1 comes with the following:

- Medication Management, including the ordering and signing of medications;
- Bed Tracking, to assist the allocation and management of beds;
- Equipment Management, allowing for tracking of equipment throughout the organisation;
- Advanced Messaging functionality;
- New Appointment Management views;
- Easier integration to third party products with the 'add-ons' module.
